

WESTWAY AVENUE SOLUTIONS

The District of Squamish requests the community's assistance in exploring solutions for the Westway Bike Network Plan.

Westway Avenue is a bike network road in the Official Community Plan.

Bike lanes are meant to provide a safe corridor for cyclists on major roadways.

Because of the limited space on Westway, the introduction of the standard bicycle lanes would result in the elimination of most of the parking on Westway. Street parking is seen as an important asset by residents on Westway.

The District of Squamish is looking for a community-based solution that recognizes the community's needs and the District's limitations.

We invite you to join us in finding a way to ensure that your main road will meet the needs of the whole community.
